

TRAPEZOIDAL (IBR) ROOFS

Fast to Install. Engineered to Last

Lumax Energy's PV Mounting Kits are purpose-built for small-scale solar projects and system expansions. Engineered for strength, ease of installation, and cost efficiency, our kits include all components required to mount solar modules on trapezoidal metal roofs. Designed to streamline your workflow and reduce onsite labor, Lumax kits help you complete jobs faster without compromising on quality or performance.

► Kit Code(s)

- LMK-KIT-IBR-5PL (5-Panel Landscape Kit)

What's in the box?

The kit consists of all the necessary components to mount a vertical column of 5 landscape panels

Here's what you will find inside.

Interclamp
LM-IC35-GP1-RNW

5 Panel Kit - 8 x

End Clamp (30-40mm)
LM-DEC30-40

5 Panel Kit - 4 x

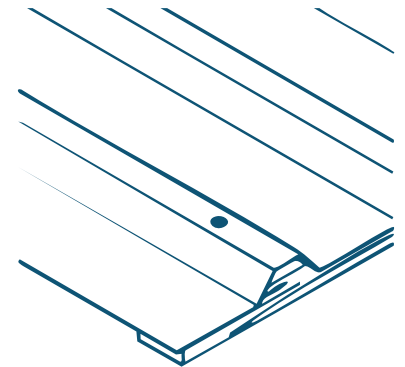

Roof Clamp
LM-SRL65-M6-E

5 Panel Kit - 12 x

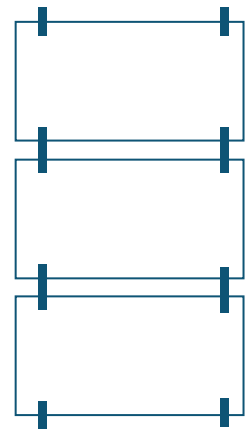

Screw(s)
FS-S-SP-25X5.5-C4

5 Panel Kit - 36 x

Trapezoidal Roof Sheeting

Landscape Panel Orientation

Additional Information

- Mid and end clamps included for both 30 mm and 35 mm panel thickness
- Anodised aluminium components – AL6063-T6 / AL6005-T5
- SUS304 stainless steel fasteners for corrosion resistance
- Class 4 self-piercing screws – No swarf, clean finish
- Pinned inter-clamps ensure secure electrical bonding between panels
